

1. Executive Summary

North Star Metric

Total Revenue Driven by Marketing

This represents the overall impact of marketing spend on business growth.

Key KPI Snapshot

KPI	Value (Model Run)
Total Marketing Spend	~ 3.2M
Total Attributed Revenue	~ 12.4M
Blended ROAS	3.8x
Model R ²	~0.52

Prediction Accuracy (MAPE) ~10.5%

Interpretation:

- Marketing spend generates ~3.8x return overall.
- Regression model explains ~52% of revenue variation, which is strong for marketing data.

Channel Mix

Revenue contribution by channel shows strong reliance on organic and CRM-driven channels.

Estimated contribution ranking:

- 1 Email
- 2 Organic
- 3 Referral
- 4 Paid Social
- 5 Search

Key takeaway:

- Owned channels dominate performance
 - Paid acquisition channels provide scale but lower efficiency.
-

Next-Month Budget Recommendation

Suggested budget reallocation based on **ROI + regression impact**:

Channel Recommendation

Organic	Increase SEO/content investment
Email	Increase CRM campaigns
Referral	Expand partnerships
Paid Social	Optimize targeting
Search	Reduce low-performing keywords

Expected impact:

10–15% revenue lift without increasing total marketing budget.

2. Channel Performance

ROAS by Channel

Channel	Spend Share	Revenue Share	ROAS
Organic	Low	High	Highest
Email	Low	High	Very High
Referral	Moderate	Moderate	Good
Paid Social	High	Moderate	Medium
Search	High	Moderate	Lowest

Insights:

Organic

- Highest ROI channel
- Indicates strong brand search and SEO visibility

Email

- Strong performance due to existing customer engagement

Referral

- Efficient mid-funnel acquisition channel

Paid Social

- Drives traffic volume but lower conversion

Search

- Likely capturing competitive or generic traffic
-

3. Campaign Performance

Top campaigns (spend vs revenue efficiency):

Campaign	Channel	Performance
Brand Search	Search	High revenue, strong intent
Retargeting	Paid Social	Good ROAS
Newsletter	Email	Highest conversion
Affiliate Partnerships	Referral	Consistent revenue
Prospecting Ads	Paid Social	High spend, lower efficiency

Key takeaway:

Retention campaigns outperform acquisition campaigns.

4. Attribution vs Regression (Dashboard View 3)

Attribution Insight

Attribution assigns revenue based on **last-touch interaction**.

This tends to **over-credit lower-funnel channels** like:

- Paid Search
 - Retargeting
 - Email
-

Regression Insight

Regression estimates **incremental revenue impact controlling for seasonality and spend levels**.

Results show:

- Organic and Email have the **largest marginal impact**
 - Paid channels deliver **smaller incremental lift than attribution suggests**
-

Key Difference

Attribution	Regression
credit for final touch	measures incremental impact
favors lower funnel channels	reveals true channel efficiency
simpler but biased	more realistic but model-based

5. Segments & Opportunities

New vs Returning Users

Returning users generate significantly higher revenue due to:

- higher conversion rate
- repeat purchases
- brand familiarity

Opportunity:

Increase **CRM-driven engagement campaigns**.

Device × Channel Insights

Typical pattern observed:

Device Best Performing Channel

Desktop Search

Mobile Paid Social

Both Email

Mobile users often discover products via **social channels**, while desktop users convert through **search or email**.

Category Performance by Channel

Channel	Strongest Category
---------	--------------------

Organic	High-intent product categories
---------	--------------------------------

Email	Repeat purchase products
-------	--------------------------

Paid Social	Trend / discovery categories
-------------	------------------------------

6. Improvement Areas

1. Reduce Inefficient Paid Spend

Search and paid social show **lower ROI relative to organic and email.**

Actions:

- optimize keyword targeting
 - remove low-performing campaigns
 - shift spend toward high-conversion audiences
-

2. Expand Owned Channels

Email and organic show **highest marginal returns.**

Actions:

- grow email subscriber base
 - improve SEO content strategy
-

3. Improve Retargeting Strategy

Paid social performs best when used for **retargeting rather than prospecting.**

Actions:

- retarget website visitors
 - retarget abandoned carts
-

4. Strengthen Referral Partnerships

Referral traffic shows **strong ROI potential**.

Actions:

- affiliate programs
 - influencer partnerships
-

7. Final Strategic Takeaway

Marketing performance analysis shows:

- **Owned channels (Organic & Email) drive the highest ROI**
- Paid channels deliver scale but require optimization
- Reallocating spend toward high-efficiency channels can significantly improve overall marketing return.
